PAPERS

Multiphase Systems

Global Asymptotic Stability of Modular Multilevel Converters.............................................. A. Antonopoulos, L. Ångquist, L. Harnefors, K. Ilves, and H.-P. Nee 603
Carrier-Based Neutral Point Potential Regulator With Reduced Switching Losses for Three-Level Diode-Clamped Inverter................................................................. P. Chaturvedi, S. Jain, and P. Agarwal 613
A Carrier-Based Neutral Voltage Modulation Strategy for Multilevel Cascaded Inverters Under Unbalanced DC Sources............................................................ Y. Cho, T. LaBella, J.-S. Lai, and M. K. Senesky 625
Asymmetrical I-Source Inverters .................................................................................................. W. Mo, P. C. Loh, and F. Blaabjerg 637
A New Interleaved Three-Phase Single-Stage PFC AC–DC Converter ........................................... M. Narimani and G. Moschopoulos 648

Machines and Drives

Parameter-Independent Online Compensation Scheme for Dead Time and Inverter Nonlinearity in IPMSM Drive Through Waveform Analysis ........................................... D.-M. Park and K.-H. Kim 701
Determination of Maximum Electromagnetic Torque in PM Brushless Machines Having Two-Segment Halbach Array ................................................................. Y. Shen, G. Y. Liu, Z. P. Xia, and Z. Q. Zha 718
Axial-Flux PM Machines With Variable Air Gap ...................................................... H. Vansompel, P. Sergeant, L. Dupré, and A. Van den Bossche 730

Single-Phase Electronics

Analysis, Design, and Implementation of Multiple Parallel Ozone Chambers for High Flow Rate ........ M. Amjad and Z. Salam 753
Interleaved Current Sensorless Control for Multiphase Boost-Type Switch-Mode Rectifier With Phase-Shedding Operation ......................................................... H.-C. Chen 766
An Accurate Frequency Tracking Method Based on Short Current Detection for Inductive Power Transfer System

Dynamic Prediction of Correlated Color Temperature and Color Rendering Index of Phosphor-Coated White Light-Emitting Diodes

A New Selective Loop Bias Mapping Phase Disposition PWM With Dynamic Voltage Balance Capability for Modular Multilevel Converter

Precision Positioning System With Centimeter Range

Renewable Energy Systems

Voltage Support Control Strategies for Static Synchronous Compensators Under Unbalanced Voltage Sags

A Fault-Tolerant Direct Controlled PMSG Drive for Wind Energy Conversion Systems

Design, Characterization, and Validation of a 1-kW AC Self-Excited Switched Reluctance Generator

Multiport Converters Based on Integration of Full-Bridge and Bidirectional DC–DC Topologies for Renewable Generation Systems

Robotics and Mechatronics

Frequency-Domain System Identification of an Unmanned Helicopter Based on an Adaptive Genetic Algorithm

Context Generator and Behavior Translator in a Multilayer Architecture for a Modular Development Process of Cyber-Physical Robot Systems

Design and Development of a Compact Flexure-Based XY Precision Positioning System With Centimeter Range

Actuators and Motors

Piecewise Affine Modeling and Constrained Optimal Control for a Pneumatic Artificial Muscle

Hybrid Stepper Motor Electrical Model Extensions for Use in Intelligent Drives

Control and Signal Processing

Estimation of Load Disturbance Torque for DC Motor Drive Systems Under Robustness and Sensitivity Consideration

Battery Emulation for Power-HIL Using Local Model Networks and Robust Impedance Control

Control Design for Interval Type-2 Fuzzy Systems Under Imperfect Premise Matching

Boundary Control of Full-Bridge ZVS: Natural Switching Surface for Transient and Steady-State Operation

COMMENTS AND CORRECTIONS

Comments on “Coordinated Path-Following Control for a Group of Underactuated Surface Vessels”

SPECIAL SECTION ON NEW EMERGING TECHNOLOGIES IN MOTION CONTROL SYSTEMS—PART I

Introduction to the Special Section on New Emerging Technologies in Motion Control Systems—Part I

SPECIAL SECTION PAPERS

Design and Analysis of Force-Sensor-Less Power-Assist Control

FPGA-Based High-Performance Force Control System With Friction-Free and Noise-Free Force Observation

Task Realization by a Force-Based Variable Compliance Controller for Flexible Motion Control Systems

(Contents Continued on Page 602)
